

DASHBOARDS: lab

Unit 3 – Query languages and visualization
S3-3 – DASHBOARDS

UNIVERSIDAD DE
MURCIA

OUTLINE

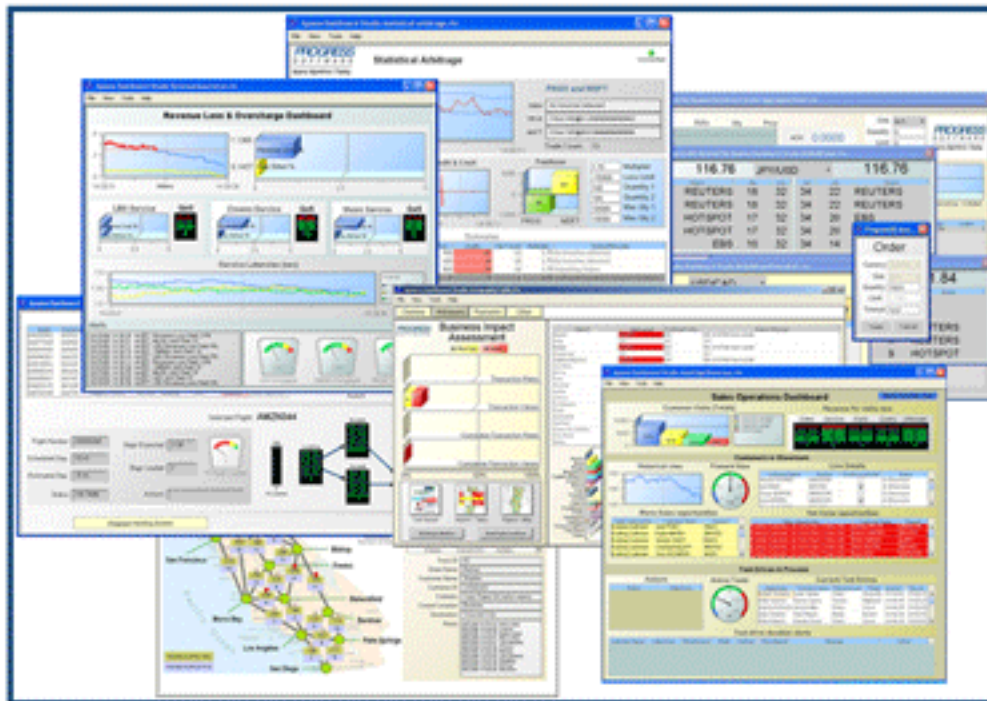

1. DASHBOARDS DESIGN
2. PENTAHO CDE

1. DASHBOARDS DESIGN (Common mistakes in Dashboards)

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

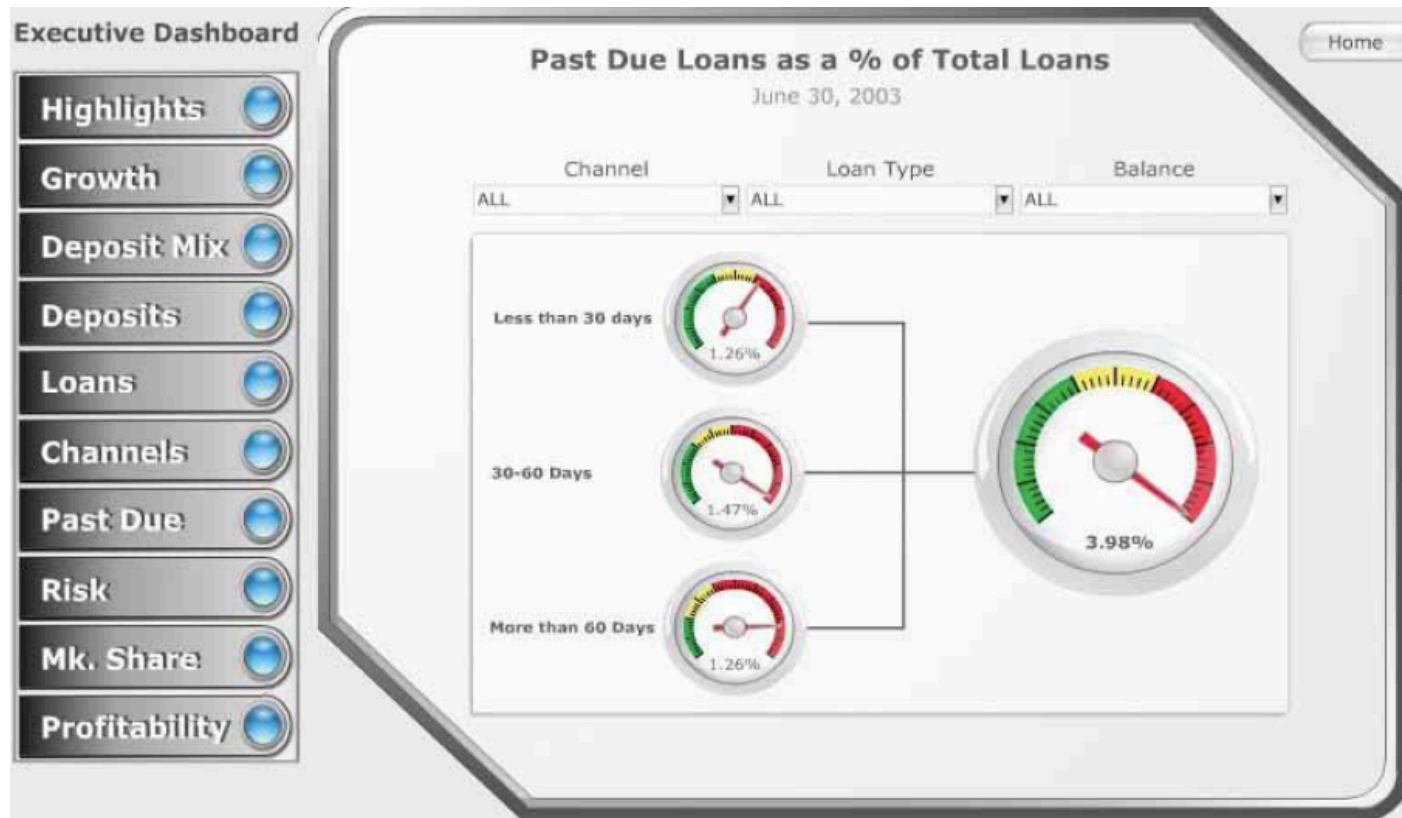

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

Exceed boundaries of a single screen.

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

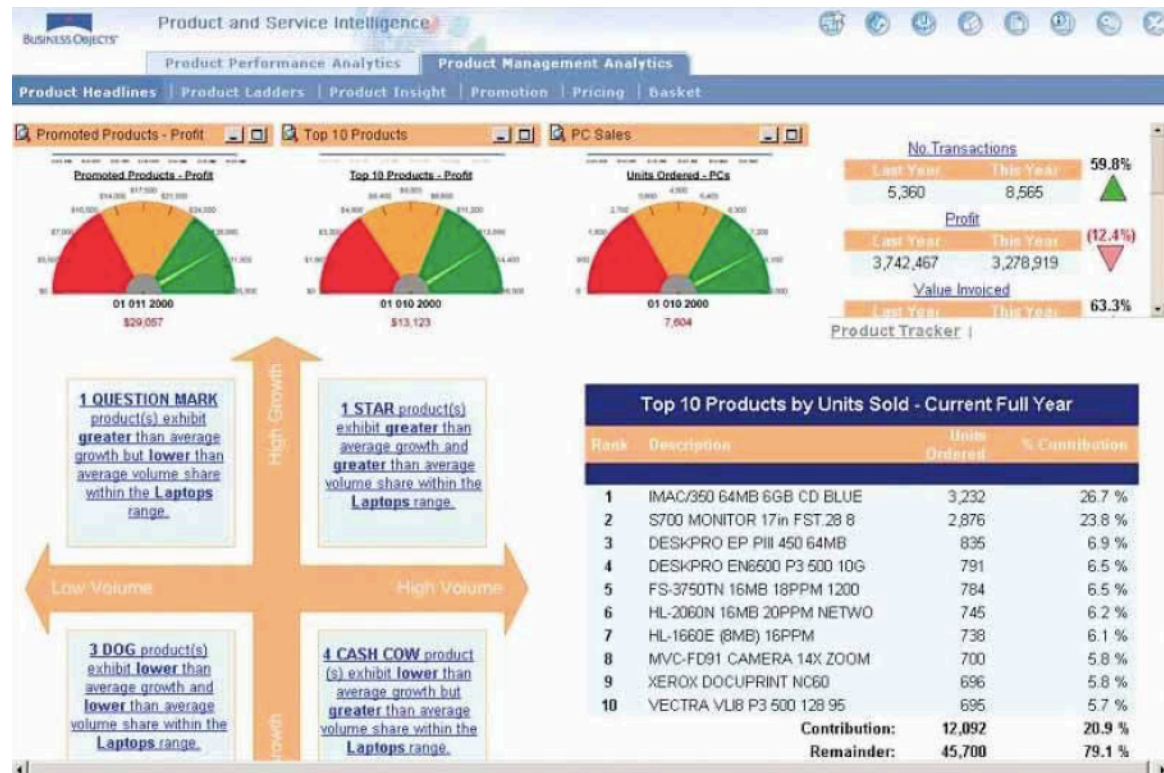

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

Fragmenting data into separated screens.

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

Requiring scrolling.

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

YTD: years-to-date

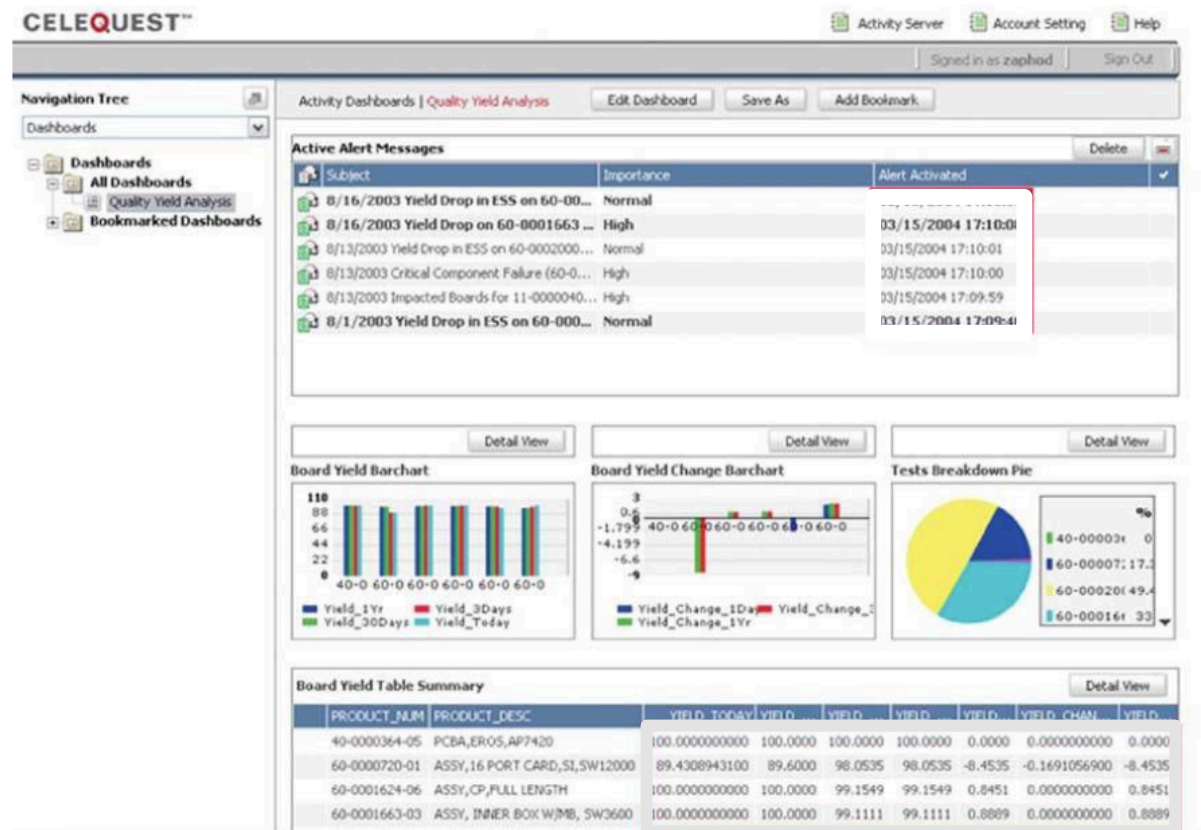

- DASHBOARDS
 - Common Mistakes in Dashboard Design.

Supply inadequate context for data

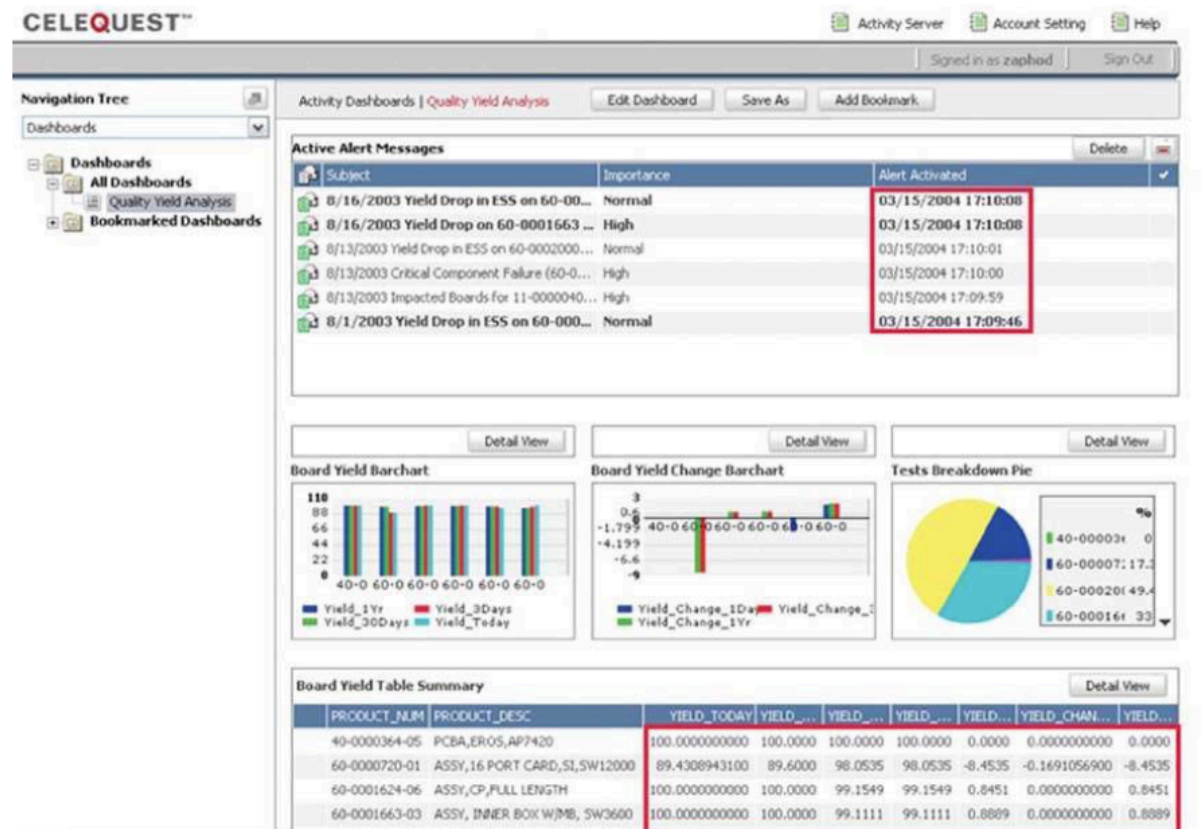

SCORECARDS & DASHBOARDS

Inappropriate Display Media

2. PENTAHO CDE COMMUNITY DASHBOARD EDITOR

- PENTAHO COMMUNITY DASHBOARD EDITOR

- Layout:

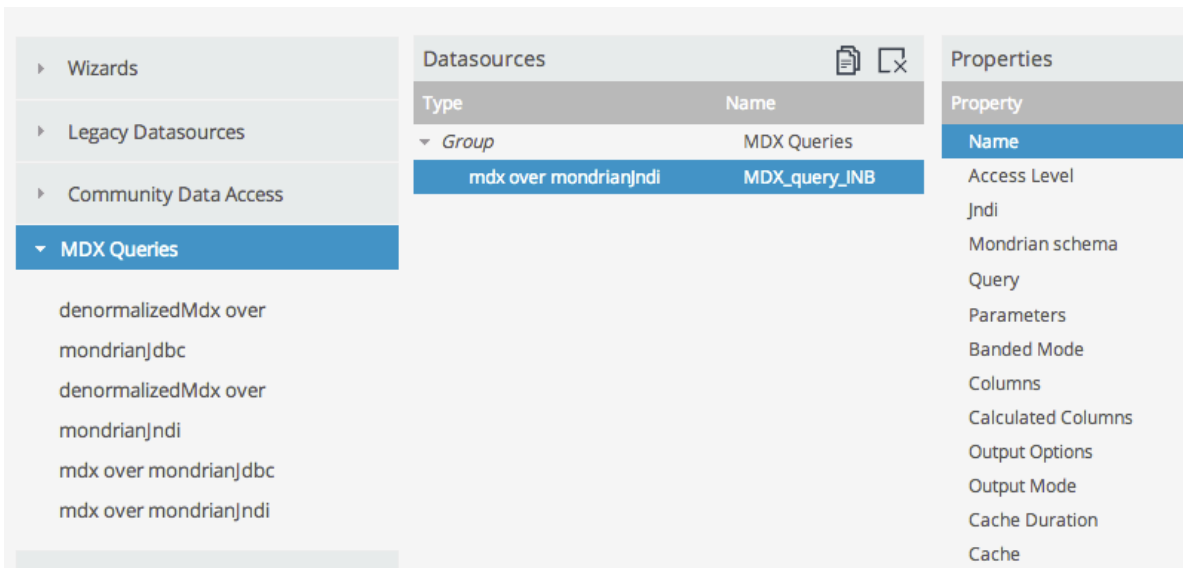

- Components:

- Data sources:

- DATASOURCES: 
 - MDX Queries.
 - Name: **MDX_queryN_INB**
 - Mondrian schema: **inXX ...**
 - Jndi: probably **in00...**
 - Query: paste MDX SELECT.

The screenshot displays the SAP Business Objects Data Warehouse Designer (DWD) interface. On the left, a tree view shows the project structure with 'MDX Queries' selected. The main area is divided into two panes: 'Datasources' and 'Properties'.

Datasources Pane:

Type	Name
Group	MDX Queries
mdx over mondrianJndi	MDX_query_INB

Properties Pane:

Property
Name
Access Level
Jndi
Mondrian schema
Query
Parameters
Banded Mode
Columns
Calculated Columns
Output Options
Output Mode
Cache Duration
Cache

- LAYOUTS: 
 - Apply template 
 - 2 columns, header and footer.
 - Rows/Columns
 - Name: id of the row
 - BackgroundColor (press checkbox to choose)
 - ...
 - Html : html code you can edit

HEADER	
spacer	
PANEL 1	PANEL 2
Small space	
FOOT	FOOT IMAGE

- COMPONENTS: 
 - Charts.
 - Name: Id of your chart component
 - Datasource: MDXqueryN
 - Title: “CAPTION”
 - HTML Object: id of column/row of the layout (html tag)
 - Example: CCCBar (datasource in columns)
- Preview (save first) 

- COMPONENTS:
 - Simple Example
 - Template layout
 - Source: MDX
 - Chart: pie/bar

```
SELECT  
NON EMPTY {Hierarchize({[Measures].  
[duracion]})} ON COLUMNS,  
NON EMPTY {Hierarchize({[procedencia].  
[procedencia].Members})} ON ROWS  
FROM [inb_student]
```

Tipo Ingreso en 2003

Waterfall

Author: John Smith

COMPONENTS:

– Simple Example

- Template layout
- Source: MDX
- Chart: bar/waterfall

```
SELECT
NON EMPTY {Hierarchize({[time.anno].[2003]})}
ON COLUMNS,
NON EMPTY {Hierarchize({[tiporingreso].
[tiporingreso].Members})} ON ROWS
FROM [inb_manolo]
```

3. MY FIRST DASHBOARD IN CDE

- LAYOUTS:

- ~~Apply template~~

- 2 columns, header and footer.
 - Html : html code you can edit

HEADER	
spacer	
PANEL 1	PANEL 2

3

```
<a style="position:relative;top:12;" border="0" title="WebDetails" href="http://www.webdetails.pt">

</a>
```

- DATASOURCES:

- MDX Queries: “Número de pacientes en urgencias por meses”
- Open SAIKU Analytics and Copy/Paste MDX query

1

Información: 10:39 / 11 x 2 / 0.0

Procedencia	January	February	March	April	May	June	July	August	September	October
Urgencias	9,667	13,75	7,727	6	6,333	7,758	7,227	6,667	4,846	3,091

2

1

- Or design your own MDX query:

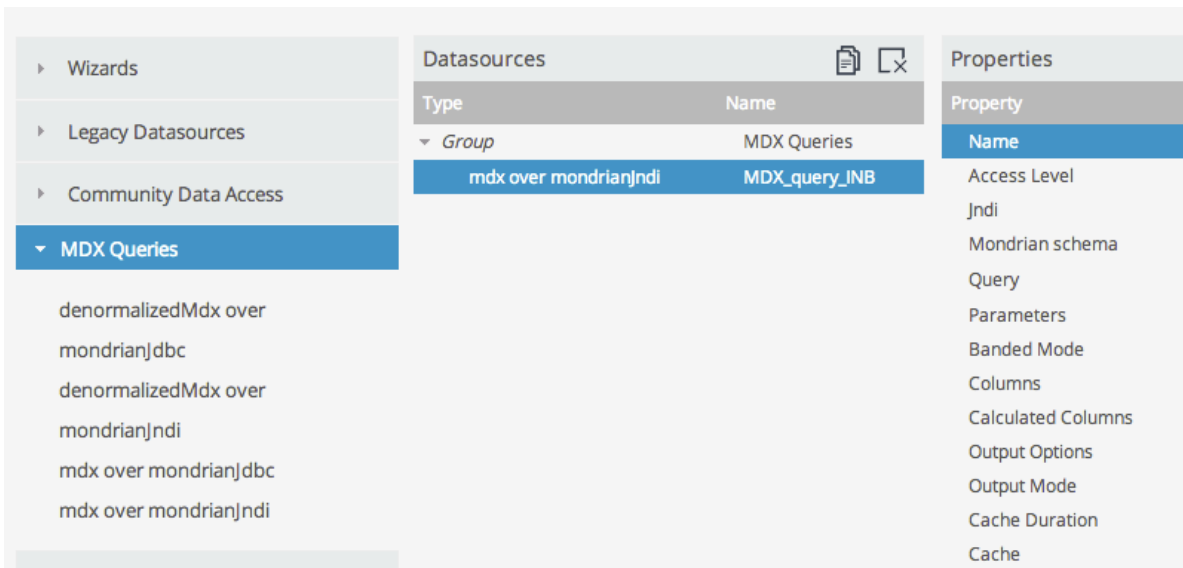

```
SELECT
```

```
    NON EMPTY {[TiempoIngreso.Tiempo].[Month].Members} ON COLUMNS,
```

```
    NON EMPTY {[Procedencia].[Urgencias]} ON ROWS
```

```
FROM [CuboTutorial]
```

- DATASOURCES: 
 - MDX Queries: mdx over mondrianJndi
 - MDX Queries: “Número de pacientes en urgencias por meses”
 - Name: query1
 - Mondrian schema: in_student ...
 - Jndi: press “i” (probably “in00con” or “inc1”)

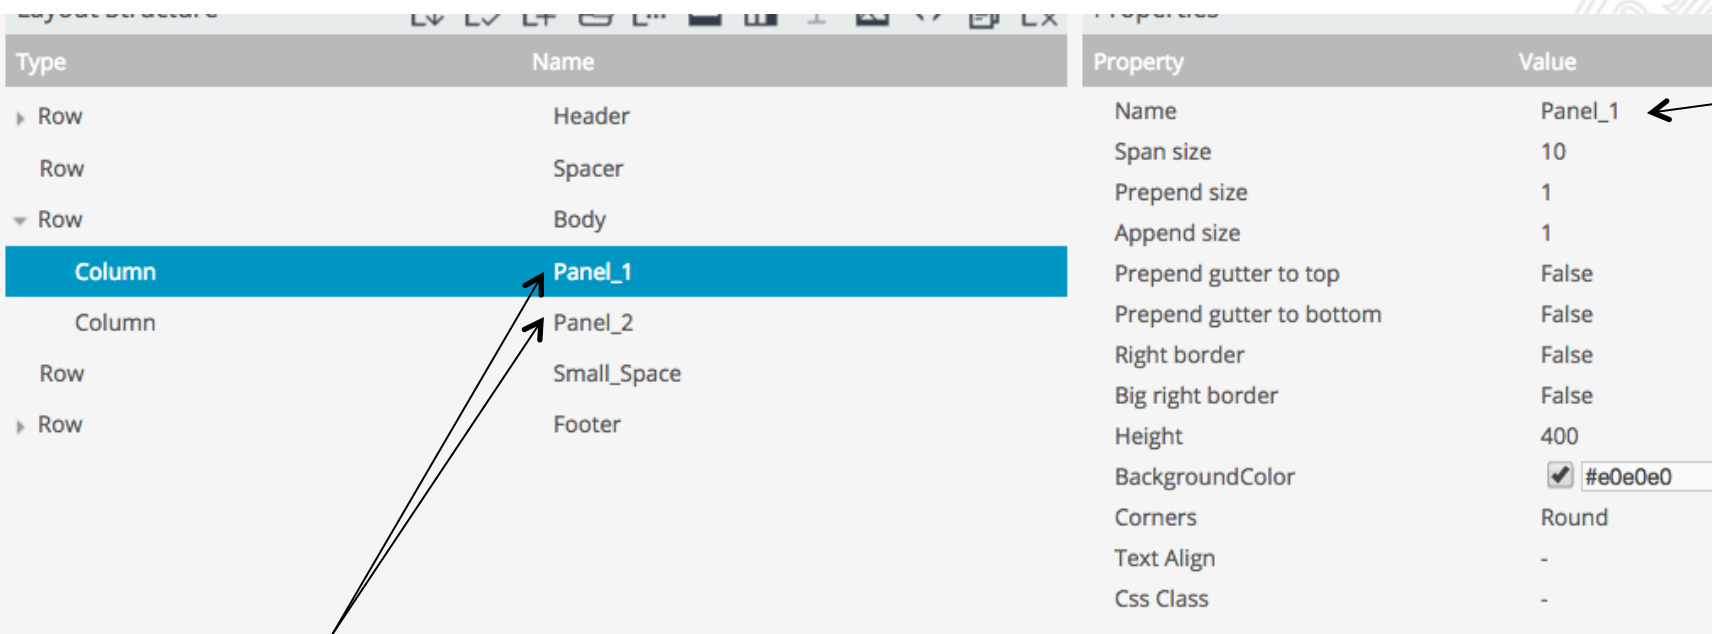

Type	Name
Group	MDX Queries
mdx over mondrianJndi	MDX_query_INB

- LAYOUTS: 
- 2 columns, header and footer.
- Check the HTML ID of panels

HEADER	
spacer	
PANEL 1	PANEL 2
Small space	
FOOT	FOOT IMAGE

The screenshot shows the dashboard layout editor. On the left, a tree view lists the components: Row, Row, Row, Column (selected), Column, Row, and Row. The 'Column' component is expanded, showing its children: Panel_1, Panel_2, Small_Space, and Footer. An arrow labeled '1' points to 'Panel_1'. On the right, the 'Properties' panel for 'Panel_1' is shown, listing various attributes like Name, Span size, Prepend size, Append size, Prepend gutter to top, Prepend gutter to bottom, Right border, Big right border, Height, BackgroundColor, Corners, Text Align, and Css Class. An arrow labeled '2' points to the 'Name' property, which is set to 'Panel_1'.

Type	Name
Row	Header
Row	Spacer
Row	Body
Column	Panel_1
Column	Panel_2
Row	Small_Space
Row	Footer

Property	Value
Name	Panel_1
Span size	10
Prepend size	1
Append size	1
Prepend gutter to top	False
Prepend gutter to bottom	False
Right border	False
Big right border	False
Height	400
BackgroundColor	<input checked="" type="checkbox"/> #e0e0e0
Corners	Round
Text Align	-
Css Class	-

- COMPONENTS:

1

- Choose CHARTS>CCC Chart
- Name: “barchart”
- Title: “Pacientesas urgencias por meses”
- Datasource: “query1” → the one created in DataSources
- HtmlObject: “PANEL_1” → componet of Layout

<h2 style="color:#606060;">**DASHBOARD FOR MY MASTER COURSE**</h2>

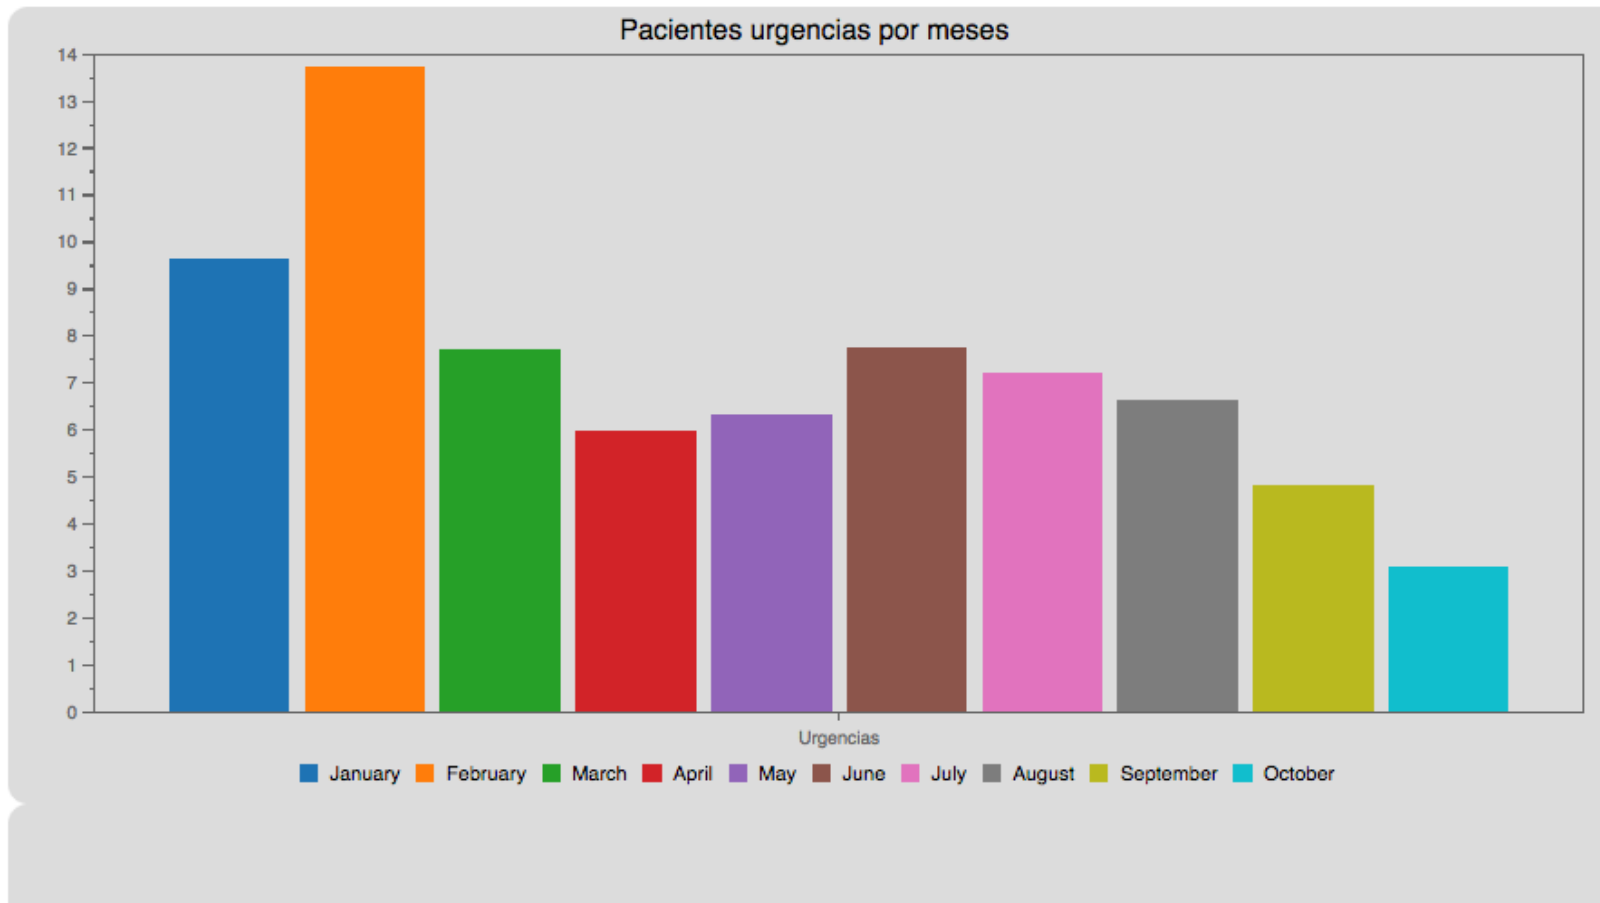

3

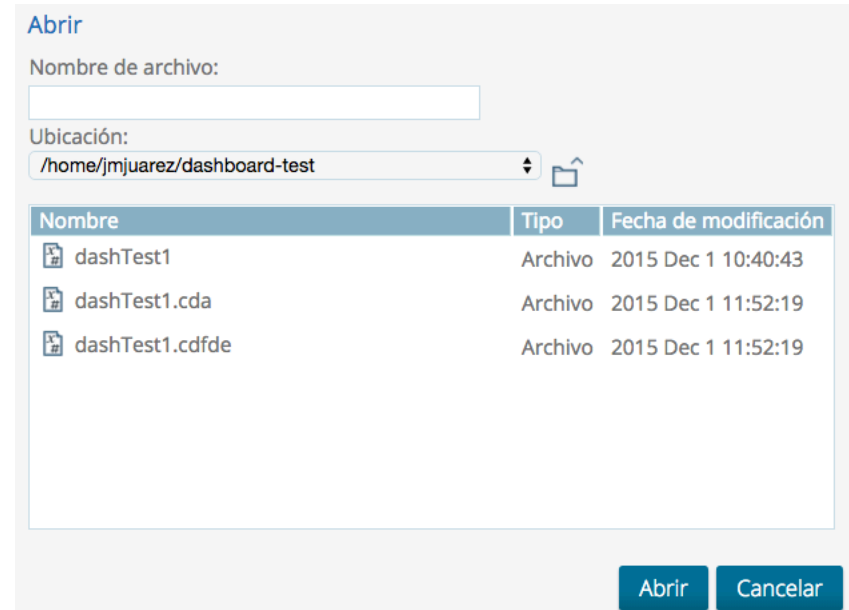

- Overview:

DASHBOARD FOR IN : MASTER BIG DATA

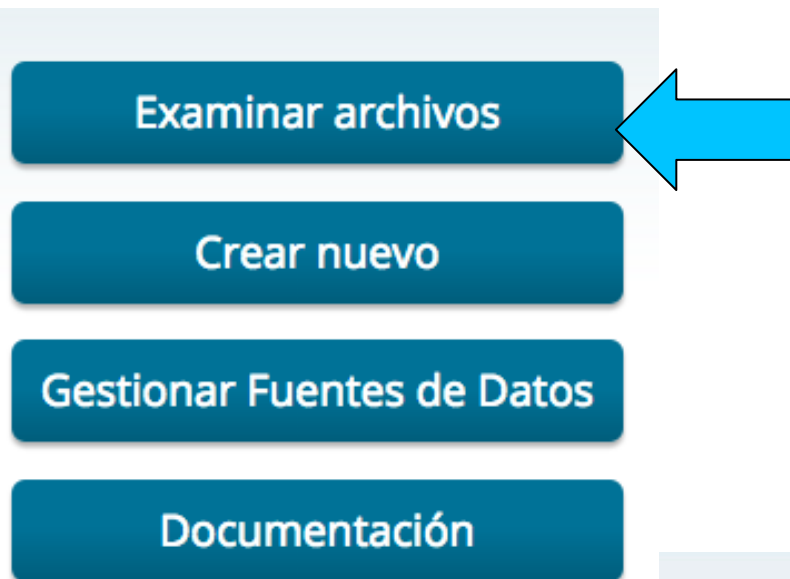

- SAVING CDE PROJECT:
- 3 FILES
 - CDE ProjectFile

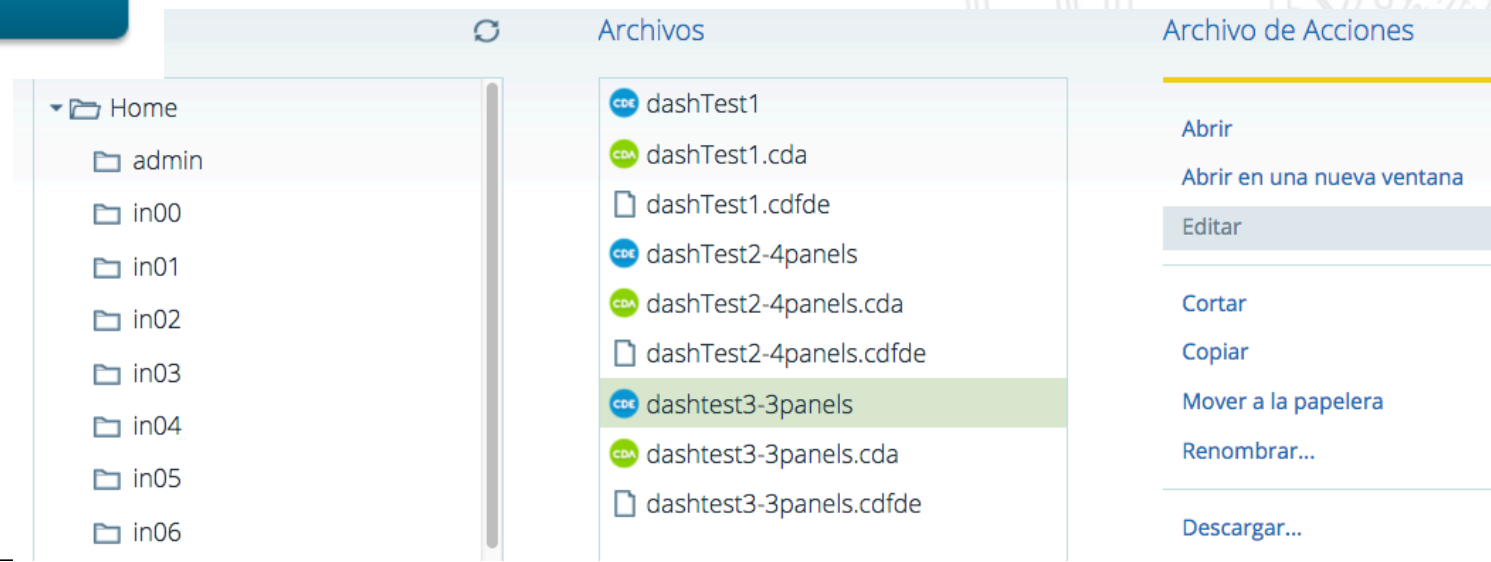

- File.cda: Community Data Access: stores the queries
- File.cdfde: sort of jsom file with dashboard template info.

- OPEN EXISTING CDE PROJECT:

CHOOSE CDE FILE → EDIT

- CREATE 2ND DISPLAY

1. New MDX Query: NxM table
2. Create Datasource: MDX mondrian over jndi → “query2”
3. Create Component:
 - CCC Chart : Heat Grid
 - Title: “Heat Grid”
 - Datasource: “query2”
 - HtmlObject: “Panel_2”

Procedencia	Médico	Quirúrgico no programado	Quirúrgico programado
Hospital	9,125	7,636	4,074
Otro hospital	11,238	17,714	25,333
Urgencias	5,664	10,846	2,333

- EXERCISE: TYPE A (To Hand In)
 - CREATE NEW DASHBOARD TO..
 - Visualize **cost in €** of patients according to:
 - Year **2004**.
 - Type of **Admission & Sex**.
 - **1 day of stay costs 250€**
 - Create the dashboard according to:
 - MDX query
 - Choose a Dashboard Format (columns/rows/pictures/etc.)
 - Choose the Components (charts)
